## **In 1350 we received a warning**

When 50 million Europeans died  
Rats were the ones who carried the plague  
and brought a Black Death to end their lives

## **For centuries we have received more warnings**

As deadly plagues have spread around the Earth  
In 2021 we all can live in hope  
That science can save us all from death

## **In December '19 we had a warning**

Doctor Wen Lang saw a viral thread  
His inconvenient truth was silenced by the state  
Now thousands round the world are lying dead

Ten years of cuts have left the country bleeding  
No P P E, the stocks are very small  
Suddenly a money tree to keep us all alive  
And the nurses are the heroes after all

## **Last summer we received a warning**

As "Eat out and Spend" was all the rage  
We were told that schools and colleges must all return  
But Covid wasn't put back in a cage

Scientists said it will return more deadly  
For the government all warnings were denied  
They were squandering our billions on their influential friends  
While hospitals were full and thousands died

**Last December we received a warning**

A new viral strain came to the land  
Lets have a happy Christmas was the Tory cry  
To spend more in the shops that was their plan

**Today we are giving you a warning.**

We know that you rats have had your day  
We see that the tide is starting to turn  
And you will all be swept away

So let's join the nurses and bus drivers  
The shelf stackers, cleaners, carers too

They're essential workers - the ones we really need

**And one day soon we're coming after you**

**YES**

**And one day soon we're coming after you**

**UK deaths within 28 days of testing positive for Covid-19**
